

Traveling Abroad

Abroad, there is a widely-spread Mercedes-Benz service network at your disposal. If you plan to travel into areas which are not listed in the index of your dealer directory, you should request pertinent information from your authorized Mercedes-Benz dealer.

Winter Driving

Have your car winterized at your authorized Mercedes-Benz dealer before the onset of winter.

- Change the engine oil if the engine contains an oil which is not approved for winter operation. For viscosity (SAE/CCMC class) and filling quantity, see *Capacities: Fuels, Coolants, Lubricants etc.* in Index.
- Check engine coolant anticorrosion/antifreeze concentration.
- Additive for the windshield washer and headlamp cleaning systems: Add MB Concentrate "S" to the premixed windshield washer solvent/antifreeze which is formulated for below freezing temperatures (see Index).

- Test battery: Battery capacity drops with decreasing ambient temperature. A well charged battery ensures that the engine can be started, even at low ambient temperatures.
- Tires: We recommend M + S radial tires on all four wheels for the winter season. Observe permissible maximum speed for M + S radial tires and the legal speed limit.

Note:

In winter operation, the maximum effectiveness of the acceleration slip control can only be achieved with M + S radial-ply tires recommended by Mercedes-Benz.
