Race inspired... luxury.

In Mercedes-Benz circles, there's a famous story that truly captures what we are all about.

Back in 1954, when racing legend Sir Stirling Moss first drove for Mercedes-Benz, he emerged from a test drive looking for a rag to wipe the dust from his face. Instead he found a mechanic waiting with a bowl of hot water, soap and a towel as a reward.

The point? That Mercedes-Benz, is, as it always has been, about outstanding performance, born on the track. But it is also about the luxurious touches that you can find nowhere else.

Genuine Mercedes-Benz Accessories deliver those touches that make your SL-Class a performance vehicle unlike any other.

Think of them as your reward.

Mercedes-Benz

Enhances your in-vehicle experience.

▶ Tradition, meet technology

Your SL-Class is living, breathing proof that in a Mercedes-Benz, performance and luxury go hand in hand, as do tradition and technology.

In an SL-Class, race-bred performance doesn't have to be austere. Genuine Mercedes-Benz Entertainment and Communication Accessories combine the finest in Mercedes-Benz tradition with the technology to keep you connected, to maintain your busy lifestyle, and to help you carry out your daily activities from the luxury of your SL-Class.

When tradition and technology meet, they breed a whole new way of thinking – the Mercedes-Benz way... your way.

Interfaces for Hands-Free Communication System¹

Keeping you in touch.

▶ The Mercedes-Benz Hands-Free Communication System offers state-of-the-art communications technology with the engineering expertise of Mercedes-Benz.

Unlike conventional systems, the Hands-Free Communication System seamlessly integrates into your vehicle and is engineered by Mercedes-Benz to provide optimum reception and sound quality while helping you keep your eyes on the road and your hands on the wheel.

The Hands-Free Communication System is available with a selection of factory option package. And we offer two ways to take advantage of it based on your lifestyle and how you use your mobile phone...

MHI Interface Cradle²

With the Multi-Handset Interface (MHI) Cradle, your phone is stored securely out of the way, it is continually charged so you never have to worry about a depleted phone battery in the car, and it links to an external antenna to provide the best possible reception when placing or receiving a phone call.

There are MHI Cradles available to accommodate a selection of popular mobile phones for most major carriers.

Bluetooth Interface Module²

With Bluetooth technology your phone connects wirelessly with the Hands-Free Communication System. Bluetooth supports hands-free audio and limited call handling functions. Since the phone is not connected in a cradle, battery charging and use of an external antenna are not possible. However you can keep your phone on your belt, in your purse... wherever it's convenient.

¹ Always plug an approved phone into the cradle for use inside the vehicle or use the approved Bluetooth interface. Otherwise operating a non-approved phone or radio transmitter with its own attached or built-in antenna while the engine is running can interfere with the vehicle's electronic systems. For safety reasons, the driver should not use the cellular phone while the vehicle is in motion. We encourage the driver to stop the vehicle in a safe location before answering or placing a call. See your Mercedes-Benz dealer for current handset availability.

² MHI Interface Cradle and Bluetooth Interface Module are sold separately and offer one year/ unlimited mileage warranties.

Regardless of the option that you choose for the Hands-Free Communication System, the experts at Auto Wireless Solutions can help you choose the right phone for your lifestyle and for your SL. For a current list of compatible phone models, visit AWS at www.Wireless4MB.com or call Auto Wireless Solutions at 1-800-226-7746 to speak to an advisor.

Mercedes-Benz Navigation System³

The world is changing every day.

16/17

▶ The Mercedes-Benz Navigation System is an in-dash unit that combines Global Positioning System (GPS) technology with detailed electronic maps to allow you to plan trips, navigate detours and help avoid getting lost. (Vehicle location is determined by the GPS system.)

The system covers more than 4.6 million miles of navigable roads in the 48 contiguous United States, plus Hawaii and Canada.

The Navigation System also offers 1.6 million Points of Interest in 40 categories including ATMs, hospitals, hotels, airports, museums and more.

NavUpdate Data

Your Mercedes-Benz Navigation System relies upon a detailed electronic map to guide you to your destinations and help you find the services and attractions that you need and want in your daily life.

But things are constantly changing out there. Roads are added or diverted, restaurants open and close, hotels and hospitals are built, ATMs move. In fact, as much as 20 percent of the navigation data is updated every year. That is why Mercedes-Benz offers updated navigation data disks to help ensure that you always have current navigation information. Call 1-800-FOR-MERCEDES or see your authorized Mercedes-Benz dealer for details.

³ Navigation system data represents the 48 contiguous United States, plus Hawaii and Canada. Directional assistance provided only when GPS coverage is available. Maps do not cover all areas nor all routes within an area. While the navigation system provides directional assistance, the driver must remain focused on safe driving behavior, including paying attention to traffic and street signs. The driver should utilize the system's audio cues while driving and should only consult the map or verbal displays once the vehicle has been stopped in a safe place.
