Designed to mount in the glove box of your CLK², the CD Changer allows you to play both commercial CDs and those that you have burned yourself in MP3 format³. | Installation Kit required |

Taking your personal music collection with you wherever you go has never been easier. Mercedes-Benz now offers seamless integration of your iPod into the audio system of your CLK. With an interface that is compatible with any dock-connector-equipped iPod device, your iPod charges while connected.

Steering wheel controls and a visual display of the track information make your iPod a perfect fit with your Mercedes-Benz.

The controls on the iPod device are disabled and its screen displays the Mercedes-Benz trademark while docked to the vehicle. Access to any video or photographic images stored on the iPod is not possible while the device is docked. iPod Integration Kit only provides access to and integrated control of audio files stored on the iPod.

Interfaces for Hands-Free Communication System⁴

Keeping you in touch.

▶ The Mercedes-Benz Hands-Free Communication System offers state-of-the-art communications technology with the engineering expertise of Mercedes-Benz.

Unlike conventional systems, the Hands-Free Communication System seamlessly integrates into your vehicle and is engineered by Mercedes-Benz to provide optimum reception and sound quality while helping you keep your eyes on the road and your hands on the wheel.

Provided that your vehicle has the optional "prewire" package, the Hands-Free Communication System can be installed at your authorized Mercedes-Benz dealership. And we offer two ways to take advantage of it based on your lifestyle and how you use your mobile phone...

MHI Interface Cradle⁵

With the Multi-Handset Interface (MHI) Cradle, your phone is stored securely out of the way, it is continually charged so you never have to worry about a depleted phone battery in the car, and it links to an external antenna to provide the best possible reception when placing or receiving a phone call.

There are MHI Cradles available to accommodate a selection of popular mobile phones for most major carriers.

Bluetooth Interface Module⁵

With Bluetooth technology your phone connects wirelessly with the Hands-Free Communication System. Bluetooth supports hands-free audio and limited call handling functions. Since the phone is not connected in a cradle, battery charging and use of an external antenna are not possible. However you can keep your phone on your belt, in your purse... wherever it's convenient.

Bluetooth

4 Always plug an approved phone into the cradle for use inside the vehicle or use the approved Bluetooth interface. Otherwise operating a non-approved phone or radio transmitter with its own attached or built-in antenna while the engine is running can interfere with the vehicle's electronic systems. For safety reasons, the driver should not use the cellular phone while the vehicle is in motion. We encourage the driver to stop the vehicle in a safe location before answering or placing a call.

5 MHI Interface Cradle and Bluetooth Interface Module are sold separately and offer one year/unlimited mileage warranties.

Regardless of the option that you choose for the Hands-Free Communication System, the experts at Auto Wireless Solutions can help you choose the right phone for your lifestyle and for your CLK. For a current list of compatible phone models, visit www.Wireless4MB.com or call Auto Wireless Solutions at 1-800-910-1021 to speak to an advisor.

SIRIUS Satellite Radio^{6,7}

Radio for the new millennium.

SIRIUS
SATELLITE RADIO

With more than 125 channels of SIRIUS satellite radio from which to choose, you can be as discerning about what you listen to as you are about what you drive. Once the SIRIUS hardware has been installed and your subscription to SIRIUS activated, over 65 channels of coast-to-coast digital-quality commercial-free music from almost any genre, and over 55 channels of exclusive sports, news, talk and world-class entertainment will literally be at your fingertips, seamlessly integrated within the audio system of your CLK.

6 SIRIUS satellite radio is a subscription-based service, available on a monthly, annual or lifetime basis. Included with your purchase of SIRIUS hardware for your CLK is six months of service. While the SIRIUS network of satellite and terrestrial antennas provides nearly seamless service throughout the contiguous U.S., SIRIUS service may be unavailable or interrupted for a variety of reasons, including environmental or topographic conditions; in certain locations such as tunnels, parking garages, or within or next to large buildings; or near other technologies that can interfere with the SIRIUS signal.

7 SIRIUS is a dealer option on 2004, 2005 and select 2006 models. Not available for many 2006 and 2007 models unless ordered from the factory.

Mercedes-Benz Navigation System⁸

More than a map.™

16/17

- ▶ The Mercedes-Benz Navigation System is a fully integrated system that combines Global Positioning System (GPS) technology with detailed electronic maps to allow you to plan trips, navigate detours and help avoid getting lost. Your vehicle's location is continuously tracked by Global Positioning System (GPS) satellites, and is displayed on the map.

The system can route you through more than 4.6 million miles of navigable roads in the United States and Canada. Just enter the address on the intelligent destination input screen, and the system takes over from there, guiding you audibly and with a clear and detailed 7" LCD map display.

Do you need an idea where to go? The Navigation System also offers 1.6 million Points of Interest in 40 categories including ATMs, restaurants, hotels, airports, museums and more.

Navigation Update Disk

Your Mercedes-Benz Navigation System relies upon a detailed electronic map to guide you to your destinations and help you find the services and attractions that you need and want in your daily life. But things are constantly changing out there. Roads are added or diverted, restaurants open and close, hotels and museums are built, ATMs move. In fact, as much as 20 percent of the navigation data is updated every year. That is why Mercedes-Benz offers updated navigation data, available for purchase from your authorized Mercedes-Benz dealer, to help ensure that you always have current navigation information.

⁸ Navigation system data represents the United States (excluding Alaska) and Canada. Directional assistance provided only when GPS coverage is available. Maps do not cover all areas nor all routes within an area. While the navigation system provides directional assistance, the driver must remain focused on safe driving behavior, including paying attention to traffic and street signs. The driver should utilize the system's audio cues while driving and should only consult the map or verbal displays once the vehicle has been stopped in a safe place. See your authorized Mercedes-Benz dealer availability and for details.
