

All models

Windshield wiper

Check edge of wiper blade for signs of hardening or cracks.

Also check that the edge of the wiper blade turns over when changing direction. If necessary, correct wiper arm offset so that end of wiper arm is parallel with wiping field. This can be easily checked by making a wooden gauge.

Operate windshield wiper and washer briefly. Wiping field should be wiped clean.

Windshield washer

Clean nozzles with suitable needle.

Check adjustment of nozzles.

Headlamp cleaning system

Check edge of wiper blade for signs of hardening and cracks.

Check adjustment of wiper blades.

Switch on parking lamp and operate headlamp cleaning system.

The water spray should hit the area just above the parked wiper blade (crosses) on the headlamps.

Clean jets with suitable needle or adjust as necessary.
